# About Us

## Making an entrance.

As a long-standing local company, our success is dependent on our good name. We have been installing windows, doors and conservatories since the introduction of PVCu.

You can be sure that when discussing your window, door or conservatory requirements with one of our friendly staff you will be offered practical, honest advice, with no pressure. We can discuss any relevant planning permission issues and building regulations and offer helpful advice on choosing products and features that complement the architecture of your home.

All our products are manufactured in-house and we carry every kitemark for quality assurance and a 10 year guarantee on all our products.

Win-dor has evolved from small beginnings to become one of the UK's most prominent PVCu and aluminium window, door and conservatory manufacturers.

Win-dor have always strived to manufacture and deliver innovative, high quality products to meet the changing demands of our customers. Today Win-dor offer one of the most comprehensive product ranges available.

With industry accreditation a necessary part of shaping a professional and quality conscious company, Win-dor have over the years gained almost every accreditation available, and in many cases they have lead the way.

Our technical experience is unparalleled and Win-dors longevity is assured through continued investment in plant, machinery, innovation and our valued staff.

For further information on our different business activities, please visit our website:

# Showrooms

## Space for you to experience.

Win-dor has the largest PVCu window, door and conservatory showrooms in the area with ample parking facilities and a complete range of different products.

We think it is much better to experience your new windows, doors or conservatory for real rather than just in a brochure. All our conservatories are fully decorated and lit, helping you to visualise your new space. Our friendly and knowledgeable team are able to offer expert and impartial advice relating to planning permission, building regulations and help you choose the right product to compliment the features and architecture of your home with no hard sell or pressure.

We encourage anyone who is interested in PVCu windows, doors or conservatories to come and see the areas largest and most impressive window, door and conservatory complex.

# Victorian

## The classical conservatory.

The Victorian is the most popular style of conservatory, with a versatility that makes it suitable for many house styles. Its distinguishing architectural features, such as a bay front give a curved appearance, and a steeply pitched roof and ornate ridge details give this style of conservatory a more classical appearance.

### The Victorian style is available in:

- Three facet - a bay front that has three main windows that give a curved appearance, widely angled for maximum space.
- Five facet - a bay front with five main windows creating a more rounded appearance.

# Edwardian

## A clean and simple look.

The Edwardian conservatory offers a clean and simple look with strong bold lines, the hip fronted corners of the Edwardian style conservatory give the optimum space for a given plan area and maximises the interior floor space.

# Gable

**A gable-fronted style of conservatory adds a sense of grandeur to any home.**

With a high slope and the same floor space as a Georgian, a Gable offers excellent use of internal space. The front panel of the roof remains upright rather than sloping back to the centre as on a Georgian, creating a feeling of great height within the conservatory.

# Mediterranean

**The lean-to style is for those who prefer the clean understated lines of a Mediterranean sun room.**

Traditional or contemporary, this style is ideal for properties with limited space under the eaves or an awkward area in which to fit a conservatory. The pitch of the roof is variable, so that a shallow pitch could fit under a bungalow roof, whilst a steeper pitch would match the roof of a terraced or detached house

# P-Shape

## The ideal style for a larger conservatory.

A P-shape can combine for example a lean-to and a Victorian, to create a versatile style that can be used as two different living areas. Due to the proportions needed to achieve the P-shape, this style is better suited to larger properties, giving an impressive result.

The larger shape is perfect as a room with a dual purpose such a lounge/dining area through to a fun family room.

The P-shape style can be specified as either a three facet or five facet Victorian or Georgian design.

# T-Shape

**The T-Shape style is more suited to larger properties due to the proportions needed.**

It's a combination style that is distinguished by a central projection that can be either a Victorian, Gable or Georgian.

A T-shape offers a large and versatile floor space and is an impressive addition to any home.

# Hipped

**Hipped roof conservatories offer a more contemporary style of conservatory room.**

Rejecting the period detailing of 'Victorian' or 'Edwardian' for a more modern look. They can be square or faceted depending on your taste and type of property.

# Box Gutter

**The utilisation of a box gutter allows the addition of a Victorian style conservatory to an even wider range of dwellings.**

A box gutter allows the conservatory to abut the existing dwelling wall or to simultaneously drain the existing house roof and conservatory roof.

# Something Different

## Create your own personal conservatory.

All Win-dor conservatories are bespoke but should you wish to deviate from the more standard designs and create your own personal conservatory Win-dor can help to create something truly personal to you and to blend in with your existing property.

# PVCu Windows & Doors

## Tailor your windows and doors.

Although our frames enjoy all the energy-saving and security benefits that come from being crafted in durable PVCu, simple extra features mean you can still achieve an authentic traditional look for your home. So you can enjoy the best of both worlds.

# PVCu Windows & Doors

**Our window and door systems combining the latest advances in technology with unrivalled design.**

Elegant and attractive yet practical, durable and energy efficient our window and door systems offer quality and style that is superior to many competitors.

# PVCu Windows & Doors

## The Win-Dor window and door systems are market leaders;

For excellent thermal properties and to achieve greater energy savings, our windows can easily achieve an "A" rating, the highest possible Window Energy Rating (WER) for thermal efficiency. Also our window and door systems contain a unique compound with a smooth gloss finish, guaranteeing they retain their pristine appearance. With our substantial steel reinforcements both our windows and doors achieve British Standards BS7950 and PAS 23/24 for security. Elegant and durable we offer unrivalled quality and style with our window and door solutions.

# Orangery

## A room for all seasons.

Thanks to the latest design techniques and high performance materials, an Orangery Room is a room for all seasons. Whether it's a cosy winter's night indoors or a long hot summer day in the garden, an Orangery Room will not only add value to your home but will make you the envy of all your friends and neighbours.

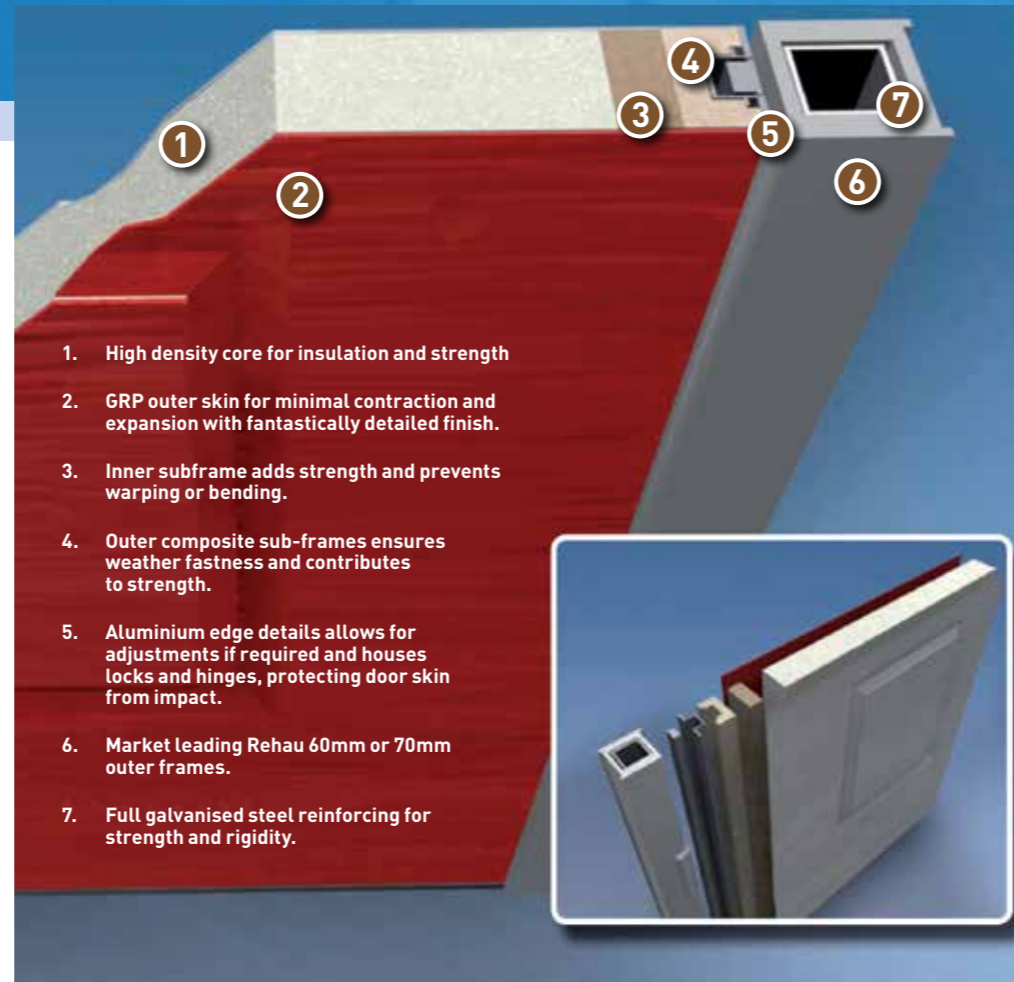

# Composite Doors

**Our composite doors are constructed using GRP skins which give defined panel relief detail and replicate a timber door appearance.**

Combined with the high density core the door will provide excellent sound and heat insulation with very low expansion or contraction characteristics.

To ensure a finish that will impress even the most discerning customer, we fit an aluminium cloaking profile to both the lock and hinge sides. This adds strength and an ideal location for the Winkhaus 2 claw STV2 Cobra mechanism.

The door can be manufactured to accept alternative lock gearing systems if required.

1. High density core for insulation and strength
2. GRP outer skin for minimal contraction and expansion with fantastically detailed finish.
3. Inner subframe adds strength and prevents warping or bending.
4. Outer composite sub-frames ensures weather fastness and contributes to strength.
5. Aluminium edge details allows for adjustments if required and houses locks and hinges, protecting door skin from impact.
6. Market leading Rehau 60mm or 70mm outer frames.
7. Full galvanised steel reinforcing for strength and rigidity.

# Heritage Vertical Sliders

**Our Heritage Windows have already been approved and installed successfully in conservation areas across the UK.**

They are designed with all the traditional detailing found in period windows, such as a deep bottom rail, slim sashes and an optional Georgian bar. Classic style brass catches and optional decorative horns replicate the traditional timber aesthetics to complete the effect.

Our Heritage Vertical Sliding Sash Windows are available in a variety of sizes and colours, which means that our windows are suitable for any style of home and shape of window. The slim sash is designed specifically to replicate the more elegant sightlines of traditional wooden windows. Available in a choice of Classic White, Soft Cream, Rich Rosewood or Warm Golden Oak.

When you choose sash windows that are designed and fabricated from our profiles, quality assurance is guaranteed. Our windows are well-balanced, so they won't stick, jar or slip and cleaning them couldn't be easier. The built-in tilt feature means that you can clean both sides of the window from the inside of the house.
